## ANALYSE INDIA – The best blog posts of 2009

Some really accurate market movements forecasted on <http://nooreshtech.blogspot.com>

### April 14 – Sensex Elliot Wave perspective in detail!

Technical chart and excerpts from the blog post – <http://nooreshtech.blogspot.com/2009/04/sensex-elliott-wave-perspective-in.html>

**"This move should touch 38/50% levels of the total fall from 21k. Corresponding levels are 12900/14500. This move in the extreme case also should not cross 15700-16k ( 61% level )"**

*The view had always been about an uncertain and worst economic period around September /October 08 where all skeletons would be out but it was much worse then one could imagine. Followed by that we would see a re-test or a closer low in Jan-March zone and a new thought emerge in March-May period.*

# get the **TECH** edge

*The story has gone as expected on the time front all through May 08 to April 09, but got a lil more worse then expected in October. As a future projection on time analysis ( fibo) the next uncertain period comes in Oct end to Dec.*

*Above all opportunities are going to be tremendous from here on and on both sides.*

**June 10 2009 – Sensex time to increase cash at 16k !**

<http://nooreshtech.blogspot.com/2009/06/sensex-time-to-increase-cash-in.html>

***"Technically the current upmove should not go beyond the 61% correction level of 16.1k. A very optimistic target could also be 75-80% retracement to 18k + which i would like to rule out as the move has been quicker then ideal time period. "***

***"As of now the simplest strategy for us is to take some profits of the table and generate a good amount of cash in the portfolio which can be re - deployed at dips with a long term horizon. The exuberance ( distribution in cases ) may stay for quite some in the markets but as an investor/trader one needs to be disciplined !! "***

## May 04 2009 – The next big move is in crude

<http://nooreshtech.blogspot.com/2009/05/crude-can-it-move-beyond-54.html>

*The next big move is possible in crude if it stays above 53.5-54 for a couple of sessions expect a move to 59-68 in medium term.*

*Till its above 50-51 the possibility remains open. 46-47 on downside is important support.*

*Regards,*

Crude Follow up article June 25 2009

<http://nooreshtech.blogspot.com/2009/06/crude-gold-and-dow-jones-update.html>

*Crude Current View :*

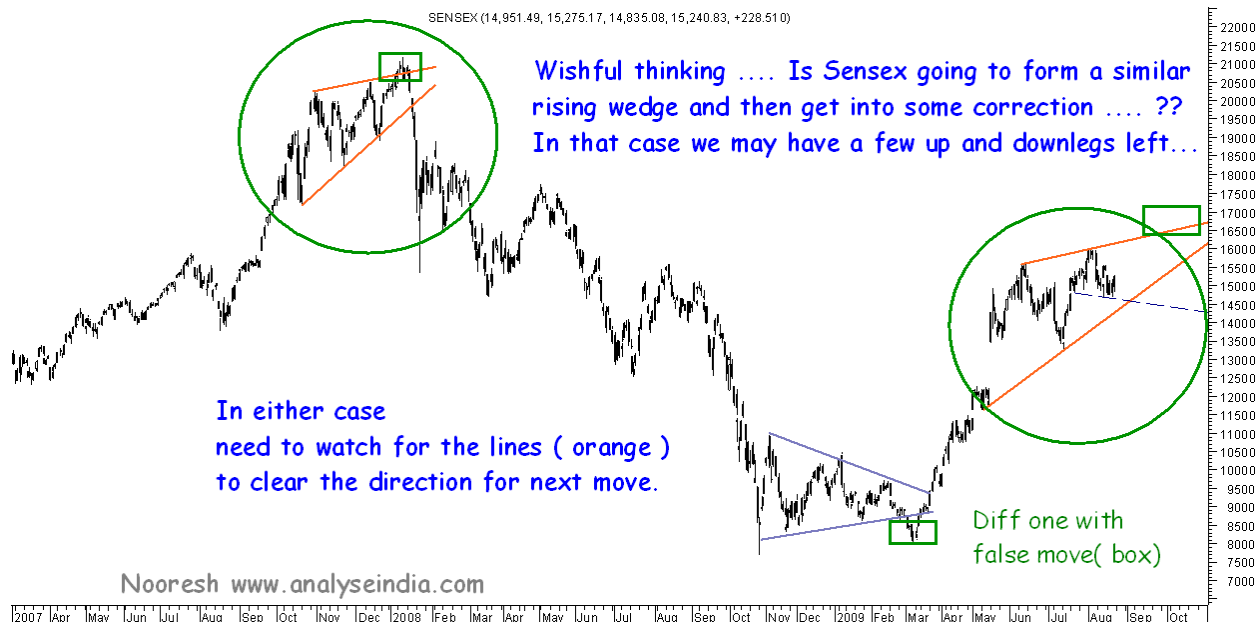

# get the **TECH** edge

*The last update was around 54 giving a target of 68 in short term. The move has almost achieved the cup and handle target (34-54 =20 dollars ) ( 54+ 20 = 74 )*

*It would be difficult for crude to cross 75-78. A move beyond 78 would be very surprising and could actually lead to a further pull up though i dont expect it in the near future.*
